SORINTEQ

Course Overview

The management of Covert Human Intelligence Sources (CHIS) in digital environments requires advanced skills in operational planning, risk mitigation, behavioural understanding, and governance compliance. As online engagement becomes more complex, so too does the requirement for structured, controlled, and defensible CHIS handling practices.

The Advanced Online CHIS Handling Course is a 5-day intensive programme designed for experienced practitioners responsible for managing CHIS activity in digital spaces. The course focuses on long-term source development, complex engagement strategies, risk management, and counter-detection, ensuring participants can operate effectively in high-risk and sensitive environments.

Delivered by expert practitioners, the course is scenario-driven and operationally focused, reflecting real-world challenges and decision-making requirements.

Who is the course for?

This course is strictly for Government personnel with prior CHIS or HUMINT experience, including:

- Experienced CHIS handlers and controllers
- Intelligence officers managing covert online operations
- Law enforcement specialists involved in covert investigations
- Operational supervisors overseeing CHIS activity
- Personnel transitioning into advanced source handling roles

Participants should have completed **introductory CHIS training** or have equivalent operational experience.

SORINTEQ

Course Content

The course delivers advanced, practitioner-level instruction across key areas, including:

- Advanced CHIS Handling Principles
- Roles, responsibilities, and advanced operational frameworks
- Long-Term Source Development and Management
- Building, sustaining, and controlling CHIS relationships over time
- Advanced Engagement Strategies
- Communication techniques, influence, and behavioural considerations
- Risk Management and Duty of Care
- Dynamic risk assessment, safeguarding, and operational resilience
- Counter-HUMINT and Detection Awareness
- Identifying adversary activity, detection risks, and mitigation strategies
- Legal, Ethical, and Governance Frameworks
- Authorisation processes, compliance, and accountability requirements
- Operational Security in Digital Environments
- Managing anonymity, digital exposure, and technical risks
- Complex Scenario-Based Exercises
- Multi-layered, realistic exercises reflecting high-risk CHIS operations
- Reporting, Documentation, and Oversight
- Maintaining defensible records and supporting supervisory review

SORINTEQ

Aims and Objectives of the Course

By the end of the course, participants will be able to:

- Manage long-term online CHIS relationships effectively and securely
- Apply advanced engagement and control techniques in digital environments
- Conduct structured risk assessments and mitigation strategies for CHIS operations
- Recognise and respond to counter-HUMINT and detection risks
- Ensure compliance with legal, ethical, and governance frameworks
- Make informed operational decisions in complex and high-risk scenarios
- Produce robust documentation and reporting to support oversight and accountability

Why Choose Sorinteq

Sorinteq delivers university-accredited, practitioner-led training trusted by Government and commercial organisations. Our Advanced Online CHIS Handling course develops high-level operational capability, ensuring personnel can manage complex, sensitive, and high-risk CHIS activity in digital environments while maintaining strict legal and ethical compliance.

Students undertaking courses provided by Sorinteq may earn credits towards formal academic qualifications such as Post Graduate Certificate, Diploma or MSc at the university of Buckingham.

For further enquiries please email info@sorinteq.com or call Sorinteq on +44 (0)333 0063248.

Sorinteq provide all necessary training equipment including laptop computers, internet connectivity, mobile devices and training material.
