SORINTEQ

Course Overview

The Certified Security Professional (CPSP) Program is designed for individuals new to the security industry who wish to develop a professional, competent, and credible skill set.

This course equips learners to operate safely and effectively across both physical and digital security environments, ensuring they can deliver comprehensive security solutions to employers or clients.

The program is flexible to suit working professionals, offered either as part-time weekend training over 12 months or as intensive block sessions. Successful completion confers certification as a security professional, with a pathway to further development under Skills Governance and private security industry standards.

Who is the course for?

This course is suitable for individuals entering the security profession, including:

- Aspiring security officers and consultants
- Corporate or executive protection staff
- Security administrators and operational managers
- Risk and compliance personnel entering security roles
- Anyone seeking formal recognition and professional development in security

No prior experience is required; the course provides foundational knowledge alongside practical skill development.

SORINTEQ

Course Content

The CPSP program provides a broad and practical foundation, including:

- Introduction to Professional Security
- Roles, responsibilities, ethics, and standards in the security profession
- Physical Security Principles
- Site assessment, access control, surveillance, and incident management

- Identifying vulnerabilities, threats, and operational solutions
- Communication and Reporting
- Producing professional, actionable reports and recommendations
- Operational Exercises and Case Studies
- Practical scenarios to develop confidence and competence in security operations
- Professional Development and Accreditation Pathway
- Enabling learners to continue development under Skills Governance and industry standards

SORINTEQ

Aims and Objectives of the Course

By the end of the course, participants will be able to:

- Operate safely and competently in physical and digital security contexts
- Conduct security assessments, manage risks, and implement protective measures
- Apply professional standards and ethical practices in all security activities
- Integrate physical and digital security approaches to deliver comprehensive solutions
- Respond to incidents with appropriate operational procedures
- Produce professional reports, recommendations, and evidence-based security strategies
- Progress along a career pathway in the private security sector with accredited recognition

Why Choose Sorinteq

Sorinteq delivers university-accredited, practitioner-led training trusted by government agencies and commercial organisations. The CPSP program provides learners with the skills, knowledge, and accreditation necessary to enter the security profession confidently, combining physical and digital security expertise into a career-ready skillset.
