SORINTEQ

Course Overview

Effective evidence recovery is a cornerstone of successful investigations. For new investigators or digital intelligence practitioners, understanding how to collect, preserve, and present evidence to the required standard can be challenging.

The Fundamentals in Evidence Course equips learners with the practical skills and knowledge required to recover, manage, and record evidence in a way that is legally robust, methodical, and admissible. The course covers digital, physical, and documentary evidence, ensuring learners are confident in producing materials suitable for court or operational decision-making.

Who is the course for?

This course is designed for professionals who are new to investigative or intelligence roles, including:

- Digital intelligence analysts and investigators
- Law enforcement officers and staff
- Cybercrime and OSINT practitioners
- Regulatory and compliance investigators
- Corporate or commercial investigation professionals

No prior evidence-handling experience is required; this course provides the foundational skills for all investigators handling evidential material.

SORINTEQ

Course Content

The course provides practical, operationally focused instruction, including:

- Introduction to Evidence Principles
- Understanding types of evidence, admissibility, and legal obligations
- Evidence Recovery Techniques
- Collecting physical, digital, and documentary materials in operational contexts
- Exhibit Recording and Chain of Custody
- Maintaining integrity and accountability of all evidential items
- Digital Evidence Handling
- Recovery and preservation of digital data from devices and online research
- Statement Writing and Reporting
- Producing clear, professional, and legally sound statements for investigation or court
- Practical Exercises and Case Studies
- Hands-on practice in evidence recovery, documentation, and scenario-based tasks
- Legal, Ethical, and Operational Considerations
- Ensuring compliance, proportionality, and professional standards in evidence management

SORINTEQ

Aims and Objectives of the Course

By the end of the course, participants will be able to:

- Understand the principles of evidence handling, recovery, and management
- Conduct investigations with awareness of evidential standards and admissibility
- Recover digital, physical, and documentary evidence to a professional standard
- Accurately record and catalogue exhibits to maintain integrity and chain of custody
- Prepare clear and comprehensive statements reflecting investigative findings
- Ensure evidence is defensible for court proceedings or internal decision-making
- Apply best practices in evidence handling within operational, legal, and ethical frameworks

Why Choose Sorinteq

Sorinteq delivers university-accredited, practitioner-led training trusted by Government and commercial organisations. Our Fundamentals in Evidence Course equips participants with specialist knowledge, practical experience, and operational confidence.

Students undertaking courses provided by Sorinteq may earn credits towards formal academic qualifications such as Post Graduate Certificate, Diploma or MSc at the university of Buckingham.
